TECHNICAL SKILLS

Languages / Frameworks: Flutter | TypeScript | Node.js | Express | Next.js | React | Dart | Golang | Java
Cloud / DevOps: Firebase | GCP | AWS S3 | Docker | CI/CD | GitHub Actions | Vercel
Tools: Postman | GitHub | Copilot | Figma
Certifications: AWS Cloud Practitioner (in progress)

WORK EXPERIENCE

Founding Software Engineer

04/2025 – Present

SuperOver 🌐

React / Flutter / Firebase / Node.js / Express.js / CI/CD

- Architected and built a **full-stack platform** for organizing local sports games, including a Flutter **mobile app**, Node/TypeScript **backend**, and React **admin dashboard** for managing venues, games, and users.
- Designed **Firestore schema** and **backend APIs** for game creation, player registration, **booking management**, venue scheduling, and real-time chat.
- Implemented real-time chat using **streaming listeners** with **client-side caching** to reduce redundant Firestore reads and improve performance.
- Integrated **Stripe payments** with **webhook verification** to confirm successful transactions before adding players to games.
- Built **CI/CD pipelines** with GitHub Actions automating mobile build and release workflows for **TestFlight** and **Android releases**.

Software Engineer

01/2024 – 05/2025

Skinopathy (HealthTech Startup) 🌐

Flutter / Golang / Docker

- Developed backend APIs in **Golang** for appointment **rescheduling** and **cancellations**, implementing request validation, controller logic, and frontend integration.
- Implemented a **health card verification system** with **automated expiry tracking** and renewal reminder notifications.
- Built a **multi-step medical questionnaire** with conditional sub-questions and multiple input types using **Flutter Provider** for state management.
- Developed an **AI skin assessment feature**, implementing questionnaire flows to collect user inputs and displaying categorized results returned by the model.
- Improved app performance and reliability by refactoring UI and state management across the app.

Software Engineer Intern

01/2023 – 12/2023

Skinopathy (HealthTech Startup) 🌐

Flutter / App & Web Development

- Built production features including a **booking system**, **food journal**, and an initial version of a **clinical questionnaire module**.
- Implemented responsive UI, navigation flows.
- Contributed to bug fixes, UI polishing, code reviews, and sprint cycles.

PROJECTS

GameOver Studio - Full Stack Music Platform 🌐

11/2025

Next.js 16 / TypeScript / AWS S3 / Spotify API / Tailwind CSS

- Built a music platform showcasing my beats, featuring a **custom audio player**, global playback state, and **secure AWS S3 audio delivery** via **pre-signed URLs**.
- Implemented **Spotify API integration** with **OAuth**, enabling top tracks/artists retrieval, and allowing music streaming using **Spotify Playback SDK**.

EDUCATION

B.Sc Computer Science

York University

2024

Toronto, Canada
